PROFESSIONAL EXPERIENCE

AllTech Services Inc.

IT Specialist | May 2023 - Present

Supporting IT operations across three branch locations, from identity and endpoints to networking, business technology, and operational reporting.

3 branch locations / 150+ employees supported / 200+ mobile & tablet devices / 50+ workstations / 20+ laptops

- **Mobile device management:** Planned and implemented IBM MaaS360 management across 190+ devices.
- **Branch infrastructure:** Installed and commissioned complete networking infrastructure for a branch location.
- **Identity & lifecycle:** Built structured onboarding, offboarding, directory, and access-management workflows around Google Workspace.
- **Asset management:** Improved asset identification and tracking using physical engraving and FileMaker-based records.
- **Business integration:** Supported systems connecting platforms such as ServiceTitan and QuickBooks.
- **Operational reporting:** Developed operational reporting and dashboards using Power BI.

Automation

Google Apps Script / APIs / Workflow automation / OCR / AI-assisted workflows / PowerShell / Python

Data & Reporting

Power BI / Operational dashboards / Reporting / Data workflows / Google Sheets

Software & Product

Next.js / React / TypeScript / Prisma / SQLite / Supabase / Web applications

Business Technology

ServiceTitan / QuickBooks / RingCentral / FileMaker / Digital signage / Asset management / Vendor systems

SELECTED SYSTEMS & PRODUCTS

ATLAS | Private

An internal operations platform built from real IT operational needs, connecting context across service desk, identity, devices, assets, networks, reporting, and business workflows.

Civaro | Development

A services marketplace designed around provider membership, quoting, booking, reviews, trust, and structured service transactions.

SMK Financial | Private

A personal financial command center for cash-flow visibility, protected reserves, debt strategy, paycheck allocation, reporting, and financial planning.

Powerball Lab | Research

A Powerball analysis environment for historical draws, ticket construction, portfolio coverage, and statistical controls-explicitly testing whether predictive edge exists.

Atlas Trading / Aegis | Experimental

An experimental multi-asset trading automation environment focused on paper execution, strategy validation, risk controls, broker integrations, and commissioning.

YOO! | Development

An emerging personal digital ecosystem exploring how independent tools, services, automation, and everyday digital workflows can work together through one coherent platform.
